

SUMMARY OF CASE LAW ON WASTE PRODUCER LIABILITY

SAUDI ARABIA

We do not have reported cases from Saudi Arabia on waste producer liability. But there is some specific legislation that addresses the subject.

Article 5 of the [Rules and Procedures for Hazardous Waste Control, Document 1423 01](#), states that waste producers *“have a responsibility to ensure that the storage of such waste treatment and disposal do not lead to their dispersion in the environment and have no adverse effect on human health, safety and wellbeing, nor on the environment and natural resources.”* In addition [Royal Commission Environmental Regulations, Volume 1, 2015 edition](#), provide: *“5.4.2 Any hazardous and non-hazardous industrial waste found to be disposed of illegally shall be retrieved by the generator and disposed of at the generators cost in accordance with these Regulations.”*
